TO
THINK
ABOUT
THE
FUTURE?

WELCOME TO TRINITY FALLS

Kairos Technologies is proud to present the world's first and only cryo-stasis facility: Trinity Falls.

*In a world of uncertainty, why take the risk?
He ne'er is crown'd
With immortality, who fears to follow
Where airy voices lead.*

- John Keats

At Kairos Technologies, we believe the future holds the answer to all of this generation's fears.

The world as we know it is changing. This is an undeniable fact. Climate change saw the hottest temperatures on record last year; Lizerski Hyperlymphoma continues to claim lives as spread of the super-cancer advances. The immediate future is uncertain - and our top experts suggest it is likely to get far worse before it gets better.

Trinity Falls is a state-of-the-art facility utilising exclusive cryo-stasis technology to secure you and your families a place in a better future. Designed to withstand even the most devastating of natural disasters or man-made weapons, our stasis chambers will keep you safely preserved for as many years as you choose. Additionally, our cutting edge sensors and unprecedented computer analysis can bring you the peace of mind that comes from knowing your awakening will be in a safe, secure environment.

Perhaps you want to meet your great, great grandchildren. Perhaps you wish to see a life where cancer or the common cold are no more. Perhaps you simply are driven by the insatiable desire to know the answer to that potentially human question: What comes next?

WHAT IS CRYOSTASIS?

First, let us tell you what it's not:

Unlike previous forms of cryostasis, your body's fluids remain where they were meant to be - inside you! Rather than replacing your blood with artificial chemicals in order to prevent damage due to the side-effects of freezing, Kairos Technologies uses an innovative and proprietary process which utilizes the quantum effects which occur at extremely low temperatures.

Bodily integrity is maintained at all times by our highly competent stasis technicians - the all-natural process means that the only chemical you will encounter is a mild sedative designed to give a perfectly restful and dreamless sleep.

Once inside our luxuriously comfortable and ergonomically designed stasis pods, you will be embedded inside one of our highly secure underground chambers, to sleep through the coming apocalypse.

Everything is specifically designed, and rigorously tested, in order to let you emerge feeling refreshed, relaxed, and alert. With our technology, you'll be in tip-top condition to greet a brave new world.

KAIROS
TECHNOLOGIES

ABOUT KAIROS TECHNOLOGIES

Founded in 2010, Kairos Technologies is a provider of innovative solutions to complex problems and a pioneer in cutting edge research. Best known for synthesising Chronomex - the chemical found in most modern industrial lubricants - the company also consults for medical giants Medicant and Biosense, as well as designing and manufacturing parts used in navigation sensors in the ODIN space shuttle.

Trinity Falls and its stasis technology is the product of Dr. Quinn Ashcroft, head of the Experimental Research Department.

CONTACT US

Places in Trinity Falls are at a premium, with only 1500 pods currently built in our secure underground facility. Although plans for expansion are ongoing, in order to secure a place for you and your loved ones, we recommend applying today online.
